**DESIGNER AND MANUFACTURER  
OF MISTING SYSTEMS**

# PRESENTATION

## OF THE COMPANY

CLIMEXT® is a registered trademark manufactured by OPOOL, a company which has established a solid experience in the field of hydraulics and the technology of High Pressure Misting Systems.

Its technical expertise and continuous pursuit for innovation and reliability has culminated in CLIMEXT®'s position as leader for High Pressure Misting Systems.

Our well-stocked warehouse combined with our technical expertise, readily available sales team and our efficient export facility mean we can satisfy all your requirements.

# DISTRIBUTION

# NETWORK

CLIMEXT® Our sales policy is supported by a network of qualified professionals who have been trained to use our products. Together with our partners, CLIMEXT® Mistig Systems is present in 25 countries across the world.

Climext® is already well-established in France and the French overseas departments and territories and the brand is well-represented across Europe. Our sales team is also present in North and West Africa, the Persian Gulf and South America.

# CAFES HOTELS RESTAURANTS DISQUOTHEQUES / COMMERCIAL AREAS

CLIMEXT® High pressure Misting Systems are perfect for comfort cooling. Whether the area to be cooled is outdoors or indoors, tiny droplets of water are dispersed as a mist, thus lowering the temperature by several degrees. Numerous Climext® installations equip campsites, restaurant terraces, bars, shops, discotheque patios, garden centres....

## AGRICULTURE

For agricultural activities, CLIMEXT® High Pressure Misting Systems are perfectly adapted for market gardening and greenhouse cultivation. For livestock farming, controlled natural cooling by mist improves the comfort of poultry and cattle, deals with the risk of infection and thus has a positive impact on the farm's profitability.

## FOOD INDUSTRY

CLIMEXT®'s High Pressure Misting Systems are highly sought after in the food industry. Maintaining a cool atmosphere avoids rapid deterioration of fresh produce, often caused by dehydration, particularly affecting fruit and vegetable displays, storage of meat, industrial cheese and the fish counter. This system enhances the notion of quality and increases produce shelf life.

## COMMUNITY FACILITIES / PUBLIC AREAS

CLIMEXT®'s High Pressure Misting Systems are ideal for areas open to the general public. The artistic effects of decorative misting embellish landscaped areas. In the heat of summer, the benefits of misting in public areas are greatly appreciated by people walking around or standing in queues... Today, CLIMEXT® systems are installed for the comfort of the public in underground stations, motorway services, embarkation areas, theme parks, playgrounds and public gardens, whilst remaining environmentally friendly.

# INDUSTRY

- The widest range of applications for CLIMEXT® High Pressure Misting Systems is found in the industrial sector.
- In certain production facilities, maintaining relative hygrometry is essential to the process.
- For dust control, the benefits of misting have proven their worth for a number of sites, factories, quarries, cement plants, public worksites, waste-treatment centres, sawmills, etc...

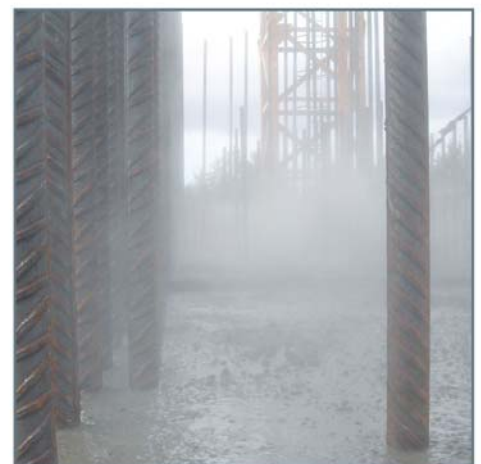

HighSpecific industrial process: the benefits of CLIMEXT® High Pressure Misting Systems are particularly suited for the production line, both for accelerating cooling whilst being economical with water and to reduce static electricity during a process. It can also be of assistance for de-moulding or to maintain relative hygrometry in a painting booth.

- CLIMEXT® High Pressure Misting helps to combat odour pollution emanating from organic or chemical waste, including the preparation of compost or indeed wherever malodorous emissions pose a problem.
- Productivity in cooling towers is greatly improved with the adiabatic cooling effects of Climext's® High Pressure Misting Systems.
- Climext's® High Pressure Misting System can also be used for preventive and curative sanitization.

CLIMEXT® High Pressure Misting Systems also helps to increase efficiency in channelling particles from filtration systems that process fumes produced by industrial facilities.

Work areas that are particularly susceptible to high temperatures and difficult conditions can also benefit from Climext® High Pressure Misting Systems. The same applies to rest areas in the workplace.
